

REMARKS

The Advisory action stated as follows:

Applicant is required to select three or four specific phosphors from those recited in Claims 11-14 which together provide bivalent europium, bivalent manganese, trivalent terbium or trivalent europium.

In response to the specific requirement, applicant hereby selects the species of:

Consistent with this election of species and in response to the directions on Page 2 of the Restriction Requirement of March 11, 2005, Applicant has now narrowed the claims to Claims 8-18, 23-35, 37 and 68-75.

Applicant appreciates the telephone conference with Examiner Yaminitzky on September 2. Applicant tried to again contact the Examiner before finalizing this Restriction Requirement, but was informed by recorded phone message that the Examiner would not be available until September 15, 2005.

If Applicant's understanding of the directions set forth in both Office Action and the Advisory Notice are not accurate, and if we were required to only elect one of the claims from Claims 11-14, Applicant would elect Claim 11, if necessary.

If there are any further questions with regards to this matter, the undersigned attorney would appreciate a telephone conference.
